

ENG 101
Lesson - 39
Dr.Surriya Shaffi Mir

We looked in detail at the 4 types of linear organizations -

- a) Chronological writing: about events in time.
- b) describing processes in linear sequence.
- c) describing a cyclic process
- d) how to show cause – effect relationships

SHIRAZ CENTER

Shiraz Center ***is a complex mixture of high and low buildings on the edge of*** Shahdara ***and the adjoining locality*** of Gujranwala just to the north east of Lahore. Although the site itself was industrial wasteland, it is in the heart of a residential district. Along one side of it runs a rail track, but in every other direction it is surrounded by bungalows and double story apartment flats. Both Shahdara and Gujranwala are fairly prosperous areas, but Gujranwala in particular has undergone extensive industrial development.

There are basically 2 ways of organizing a description of a place. One way is to describe the place as if it was being seen from the air - i.e. a bird's eye view.

The other is to describe it from the point of view of a walk through it which is known as a pedestrian's view.

e.g., The sentence 'Afghanistan is a landlocked country' seems to be about Afghanistan. In this case 'Afghanistan' is also the subject of the sentence.

However, in the sentence 'To the east lies Pakistan',

‘To the east’ is not the subject but is very important information as it locates the position of Afghanistan in terms of some reference point which we already know.

to the north

to the west Afghanistan to the east

Practice 2. Read the following texts and see which is easier to understand.

a) I live in Quetta. The capital of Baluchistan is Quetta. A part of Pakistan is Baluchistan.

I live in Quetta. It is the capital of Baluchistan.

Baluchistan is part of Pakistan.

I Quetta It (Quetta) Baluchistan
Baluchistan Pakistan.

Practice 3.

Read the spatial description of Lahore and underline the locational expressions that are used to guide the reader through the description.

LAHORE: THE OLD & MODERN CITY

The hub of the old city of Lahore is the spacious Minar-e-Pakistan grounds in what used to be called Minto Park (the place where the historic Lahore Resolution demanding the creation of Pakistan was made in 1940).

Here some of the city’s main traffic arteries meet. To the South West of the park are the old Mughal buildings; The Badshahi Mosque built by Emperor Aurangzeb, the Old Fort dating back to Emperor Akbar, the first Mughal ruler, as well as the famous Demontmorency College of Dentistry. To the North East is the depleted river Ravi. To the North West of

the park is the tomb of Ali Hajwary, popularly known as Data Sahib, the patron saint of Lahore.

Just beyond Data Sahib are located the district and session courts leading on to the main road of Lahore, The Mall. It is lined by important buildings like the old Punjab University, The National College of Arts, the Lahore Museum as well as hotels. The goods sold in the shops here are marked with fixed prices, which cannot be reduced by bargaining as in the shops in the old walled city.

Note: Descriptions of spatial locations are normally organized according to conventional ways of looking at scenes. The most common are:

- general to particular - whole to part
- large to small - outside to inside
- top to bottom - left to right / vice versa

The main point is to be consistent. Which ever convention you choose, be consistent and use it throughout so that the reader is not confused.

ways of classifying things

how to relate classification to
conventions of writing and
to practice writing texts based on
classification.

One of the easiest ways to organize things is to look for relationships among objects or ideas and arrange them according to their similarities and differences

Practice 4: Look at the following set of words and put them into groups.

(a) anger love fear emotion envy

(b) table menu waiter restaurant cash register

- (c) greetings a wave 'hello' 'hi' 'salaam'
- (d) sleep, dream, manager, intelligent happy, teacher.

Practice 5:

The following sentences form a text which refers to the classification chart on FRUITS. Except for the first sentence, they are not in the most logical order. Try to arrange the sentences according to a logical order to form a complete text which fits the organization of the classification chart.

- (i) There are three general types of fruits: simple, aggregate and multiple fruits. (__)
- (ii) Examples of dry dehiscent fruits are fruits of the African tulip, rubber and the pod of the flame of the forest. (__)
- (iii) An aggregate fruit is one which develops from a flower with several ovaries. (__)
- (iv) Example of fleshy indehiscent fruits are the papaya, mango and banana. (__)

(v) Each ovary develops into a separate fruit; and so a cluster of fruits may arise from the main fruit stalk. (___)

(vi) The guava, tomato and coconut are simple fruits. (___)

(vii) A composite or multiple fruit is one which develops from a group of flowers (___)

(viii) The jack fruit and the pineapple are examples of multiple fruits. (___)

(ix) Both dry and fleshy fruits may be either dehiscent (i.e. they split open allowing the seed to escape when ripe) or indehiscent (i.e. they do not split open when ripe). (___)

(x) Fruits are also classified as dry and fleshy fruits. (___)

Writing a Classification. Writing a classification is based on convention i.e. how others have done it. But it is mainly based on your purpose in making the classification. Data and ideas are divided into categories and this is done in a logical way. Some types of order are (i) according to time (oldest to newest)

(ii) general to particular,

(iii) scale:

(a) importance: most important to least important

(b) size: largest to smallest

(c) familiarity: best known to least known

Practice 6 (Sample)

Education

Formal

Informal

full time

part time

-

correspondence course

school

evening classes

- open university

college

short intensive courses

- T.V. broadcasts

university

research based study

radio broadcasts

adult

learning centers

self study course

Practice 7: See how this letter is addressed.

Dr. Ms. A. T. Shah

41, St. 27

Mohalla Araian

Sialkot. Punjab.

Pakistan.

The logical order here is from the smallest unit (house to the largest (country)

The following table shows some of the most common language used in sentences which have classification as their purpose.

I.
