

ENG 101
Lesson -7
Dr.Surriya Shaffi Mir

The English language makes frequent use of this method of word formation. Notice the numerous words formed on the stem *act*.

Prefix+ <i>act</i>	<i>act</i> + suffix	prefix+ <i>act</i> +suffix
re+act	act+ion	re+act+ion
enact	active	enactment
reenact	actively	reenactment
interact	actionless	reactor
transact	actable	reactive
	activity	reactivate
	activate	reactivation
	activation	interaction
	actor	transaction
	actress	inactive
		inaction

Both prefixes and suffixes are referred to as Affixes

Let us now consider some suffixes and their usual meanings.

SUFFIXES

NOUNS	VERBS	ADJECTIVES	ADVERB
-ance	-ize	-able	-ly
-ence	-ate	-ible	
-or	-fy	-less	
-er	-en	-ic	
-ist	-ify	-ical	
-ness		-ish	
		-ive	

Noun-forming suffixes:

SUFFIX	MEANING	EXAMPLES
-ance	state	performance
-ence	quality of	independence
-er, -or	a person who	programmer, operator
-ation }	a thing which	compiler, accumulator
	the act of	execution

-tion		
-ist	}	a person who
-yst		
-ness		condition of
-ion		action/state
-ing		activity
-ment		state, action
-ity		state, quality
-ian		pertaining to
-ism		condition/state
-dom		domain/condition
-ship		condition/state
-ary		binary

analyst, typist

cleanliness

conversion

multiplexing

measurement

electricity

electrician

magnetism

freedom

relationship, partnership

Study these tables and try to find additional examples. Use your dictionary if necessary.

Verb-forming suffixes

SUFFIX	MEANING	EXAMPLES
-ize } -ate } -fy } -en }	to make	computerize automate, activate, calculate simplify harden, widen

Adverb-forming suffixes:

SUFFIX	MEANING	EXAMPLES
-ly	in the manner of comparably, helpfully	electronically, logically

Adjective-forming suffixes:

SUFFIX	MEANING	EXAMPLES
-al		computational, logical
-ar	have the quality of	circular
-ic		magnetic, automatic
-ical		electrical
-able	capable of being	comparable
-ible		divisible
-ous	like, full of	dangerous
-ious		religious
-ful	characterized by	helpful
-less	without	careless
-ish	like	yellowish
-ed	having	computed, punched
-ive	quality of	interactive
-ing	to make or do	programming, coding processing, multiplexing

Adjective-forming suffixes:

SUFFIX	MEANING	EXAMPLES
-al		computational, logical
-ar	have the quality of	circular
-ic		magnetic, automatic
-ical		electrical
-able	capable of being	comparable
-ible		divisible
-ous	like, full of	dangerous
-ious		religious
-ful	characterized by	helpful
-less	without	careless
-ish	like	yellowish
-ed	having	computed, punched
-ive	quality of	interactive
-ing	to make or do	programming, coding processing, multiplexing

Locating base words:

• It is sometimes difficult to locate base word, because their spelling frequently change when suffixes are added to them.

If a base word ends in e, the e may be dropped when a suffix is added to it.

Mature + it y = maturity

2. If a base word ends in y, the y may be changed to i, when a suffix is added to it:

harmony + ous = harmonious

3. Base words may undergo other spelling changes when suffixes are added to them:

reclaim + ation = reclamation (the l in reclaim is dropped)

Exercise 1.

Locate the base words in the boldface words and write them on the given lines.

1. We established the **authenticity** of our antique chair.

We have an ----- antique chair.

2. We enjoy the **collegiate** athletic games.

We enjoy the athletic games at -----.

3. The automobile left her **comatose**.

The accident left her in a -----.

4. We had **comparative** good luck..

If you ----- our luck with that of others, our luck was good.

• 5. Can you **differentiate** between them?

• Can you see how they -----?

6. His knowledge of China is not **experiential**.

• His knowledge of China is not based on actual -----?

7. She has **expertise** in mathematics .

• She is an ----- in mathematics.

8. She gave her answer with **finality**.

• We knew her answer was -----.

9. They have **servile** attitudes.

• They have attitudes of those who -----.

10. The numbers are in **tabular** form.

The numbers are in a -----.

11. We enjoyed her **commentary** on the news.

We enjoyed her -----s about the news.

12. Who were the **disputants**?

Who engaged in the -----?

13. This machine has a **multiplicity** of parts.

It has ----- parts.

Exercise 2

Read the following sentences and underline all the suffixes. Then try to find out what parts of speech the words are.

1. The systems analyst provides the programmer with the details of the data processing problems.
2. CRT terminals are very useful interactive devices for use in offices because of their speed and quietness.
3. The new microcomputer we purchased does not have a FORTRAN compiler. It is programmable in BASIC only.
4. A computer is a machine with an intricate network of electronic circuits that operate switches or magnetize tiny metal cores.
5. In very large and modern installations, the computer operator sits in front of a screen that shows an up-to-date summary of the computer jobs as they are being processed.
6. The introduction of terminals and screens has partly replaced the use of punched cards.
7. Binary arithmetic is based on two digits: 0 and 1.
8. Multiplexing is when many electrical signals are combined and carried on only one optical link.
9. Computers are machines designed to process electronically specially prepared pieces of information.
10. The computed results were printed in tables.

Exercise 3

Fill in each blank with the appropriate form of the words.

1. *Operation, operate, operator, operational, operationally, operating*. A computer can perform mathematical Operations very quickly.
b. One of the first persons to note that the computer is malfunctioning is the computer operator.
c. The job of a computer operator is to operate the various machines in a computer installation.
- d. The new machines in the computer installation are not yet operating/operational.
2. *acceptance, accept, accepted, acceptable, acceptably*
 - a. A computer is a device which accepts processes and gives out information.
 - b. The students are still waiting for their acceptance into the Computer Sciences program.
 - c. It is acceptable to work without a template if the flowcharts are not kept on file.
3. *solution, solve, solvable, solver*
 - a. It may take a lot of time to find a solution to a complex problem in programming.
 - b. A computer can solve a problem faster than any human being.
 - c. A computer has often been referred to as a problem solver.
4. *remark, remarkable, remarkably, remarked*
 - a. Today's computers are remarkably faster than their predecessors.
 - b. System analysts will often make remarks about existing programs so as to help make the operations more efficient.

- c. There have been remarkable developments in the field of computer science in the last decade.
5. *Communication, communicate, communicable, communicative, communicably*
a. A computer must be able to communicate with the user.
b. Fiber optics is a new development in the field of communication.
c. Some people working in computer installations aren't very communicative because they are shy.
6. *calculation, calculate, calculating, calculated, calculator, calculable, calculus*
a. A computer can do many kinds of calculations quickly and accurately.
b. Calculus is a branch of mathematics for making calculations without the use of a calculating machine.
c. A computer can calculate numbers much faster than a manual calculator.
d. Some problems aren't calculable without logarithm tables.
7. *Mechanic, mechanism, mechanize, mechanical, mechanically, mechanistic, mechanics, mechanization, mechanized*
a. Today's computers are less mechanized than they used.
b. The mechanical devices in a computer system operate more slowly than the electromagnetic devices.
c. The mechanism of the brain is very complicated but unlike a computer it isn't mechanical.
8. *Necessity, necessitate, necessary, necessarily, necessities, need, needed*
a. Because it is expensive to set up a computer department it is necessary to budget well for the basic necessities of the installations.
b. A good programmer isn't necessarily going to be a good systems analyst.
c. Students' lack of understanding of the basic concepts in computer science may necessitate the instructor to restructure the course.
9. *Dependence, depend on, dependable, dependably, dependent, dependency, depending*
a. The length of time a programmer takes to make a program will vary depending on the complexity of the problem and his ability and experience.
b. One can always depend on a computer to obtain accurate answers because it's probably the most dependable machine in the world today.
10. *Technology, technological, technologically, technologist*
a. Computer technology is a fast growing discipline.
b. The technological improvements of computers are reducing man's workload.
