

ENG 101
Lesson -37
Dr.Surriya Shaffi Mir

Concl Restatement/Summary
Para opinion: final comment Conclusion
There are **three** main patterns for organizing the body of the essay. Writing showing relationships: (i) Linear

(ii) Spatial relationships

(iii) Comparison and contrast. I- Linear relationships (4 types) describing

a) Chronological b) process in linear sequence.

II- Spatial relationships: classifications & definition

III- Comparison in contrast

c) Process in cyclic sequence

d) cause-effect

Practice 1. Read the following text and complete the diagram which follows.

As long ago as 1779, John Frere, an English country gentleman, discovered, at Suffolk several bones from extinct animals associated with stone age flint tools. He published his findings in 1800. Frere's report was not appreciated for another 60 years. But now Frere is known as the founder of prehistoric archaeology.

New Scientist, London

1800

List the words and phrases that demonstrate the chronological order of the above paragraph

Practice 2:

Put the following information in an acceptable order.

1In 1930, the first analog computer was built by an American named Vannevar Bush. 2This device was used in World War II to help aim guns. 3Mark I, the name given to the first digital computer, was completed in 1944. 4This was the first machine that could figure out long lists of mathematical problems, all at a very fast rate. 5Another important advancement in computers came in 1947, when John Von

Newmann developed the idea of keeping instructions for the computer inside the computer's memory. 6 In 1946 two engineers at the University of Pennsylvania, J. Eckert and J. Mauchly, built the first digital computer using parts called vacuum tubes.

Practice 3.

Read the following text and see if you can answer the questions given at the end.

A Kashmiri Emigrant's Story

In 1947, Ahmed Din butt, a poverty-stricken twenty year old farm worker left Kashmir for Pakistan. What the future held in store for him, he did not know.

However, he did not that it could not be any worse than the past. He had grown up during the cruel rule of the Dogras in Kashmir and had known what it was to be hungry and jobless.

He had watched his mother die of tuberculosis a month before; his father had died a year after Ahmed Din was born. There was nothing now to keep him in Kashmir and so, on a cold march morning, he got into a bus bound for Rawalpindi. In years to come he would remember this moment. A) Why do you think the passage starts with 1947 and then goes back into the past rather than starting in the past and ending with 1947?

b) If the text were in the expected sequence, what verb tense would you expect to find used?

c) Which of the following tenses are used in the text?
Present / present perfect / past / past perfect

Practice 4.

Look at another version of the same story. Compare the two versions. Which is more interesting? Ahmed Din Butt was a bright but poverty stricken twenty year old farm worker who grew up during the Dogra rule in Kashmir. He knew what it was to be hungry and jobless. His father had died in 1928, he had watched his mother die of tuberculosis in February 1947. There was nothing to keep him in Kashmir, so, on a cold march morning in 1947, he got into a bus bound for Rawalpindi. In years to come he would remember this moment.

Practice 5.

How to mend a punctured football.

Take bladder out of its cover

inflate it a little

dip into tub of water, with marker

let air out press to find out the hole

mark spot, dry bladder

rub marked place and a rubber piece with sand paper

apply rubber solution to both, let them dry

place rubber piece on bladder press the two very hard

Practice 6.

Convert the following process as a flow diagram by filling in the boxes.

STEPS IN PROBLEM SOLVING.

Next the programmer must construct an algorithm flowchart or a block diagram. The relationship between the events is shown by means of a connecting arrow. This is followed by translating the algorithm / flow chart into a computer program. The

program is usually written on coding sheets which have a specific format drawn on them. The programmer must then keypunch the program. Or key it in at a terminal. The program must then be tested. Next a print out show if the works or if it has errors (bugs). The last step is to add the data to the program and run the program.

The following table gives some sequencing words that are used when describing a process:

<u>Beginning</u>	<u>Middle steps</u>	<u>End</u>
-First	-second (ly)	-last (ly)
- firstly	- third (ly) etc.	- finally
- to begin with	- next	-at
the end		
- initially	- then	
	- subsequently	
	- after this	
	- before this	
	- at the same time	

1Many scientists have worked on solar heating. 2One such attempt was made in 1949 when a house was designed which was heated by using the energy from the sun. in this house energy from the sun was absorbed by a large area of blackened metal sheets which were covered by double plates of glass. 3The air circulating behind the metal sheets carried away the heat. 4Before the heat could be blown around the house it was first stored in large tanks containing Glauber's salt, a given volume of which can hold eight and a half times more heat than water.

Practice 7

- a) Rice is harvested out in the fields. (____)
- b) Hired laborers load the rice onto bullock carts. (____)
- c) The truck cart drivers bring the rice to the factory. (____)
- d) The laborers put the rice into the threshers. (____)
- e) The rice is threshed by machines. (____)
- f) These machines are regularly maintained. (____)
